

# Lab Hazards

## Identify, mitigate, be compliant

Simplifies hazard assessments for research labs and recommends the proper Personal Protective Equipment (PPE).

### Principal Investigators:

- Identify hazards in the lab and needed PPE
- Communicate hazards to lab personnel
- Maintain records of PPE assessment and training

### Lab Personnel:

- Obtain lab hazard information
- Receive required PPE training

### Environmental Health and Safety (EH&S):

- View types of labs and hazards present
- Track completed hazard assessments and PPE training
- Allocate resources and PPE based on hazards

## FEATURES

### Protection Plan

Provides PPE recommendations based on hazard assessment

### Notifications

Sends email notifications for upcoming hazard assessment renewals

### Distribution

Provides mechanism for PPE distribution and tracking

### Safety Training

Includes online PPE safety training course
